## SILVER COINS OF SWEDEN 1540-1935

The silver coins of Sweden have always been considered the most artistic and well struck of all modern coins. They have long been popular with collectors both in the United States and abroad. This particular collection was formed over a period of many years and contains many desirable pieces. For the convenience of bidders we have indicated the size of the pieces by using the terms crown, half-crown, etc. The coins have been listed in chronological order as we believe this method more logical for this type of collection.

## GREEK BRONZE COINS

The following pieces are in better than average condition and range in value from 50 cents to several dollars each. They are the least expensive and probably the most interesting of all ancient coins. There are hundreds of types and thousands of varieties that afford a never ending interest to the collector. Contrary to the general belief they are not difficult to attribute and with a little study any collector can familiarize himself with the principal types.

The references given (H) refer to the page number in *Historia Numorum* by Barclay V. Head, 1911 edition. This is the most valuable book ever written for the collector of Greek coins. It is still in print and ought to be on the shelf of every serious collector.

## COMMEMORATIVE AND AWARD MEDALS

This is a collection of several series of medals, mostly by American artists and issued in relation to American events. There was a time when such an offering would attract the attention of all serious collectors in the United States. Today medal-collecting is in the doldrums. It has been years since any dealer has bothered cataloguing a collection. And that probably is the reason why so few collect them. We propose to do what we can to encourage the collecting of them. United States medals are just as important and equa'ly as interesting as United States coins, and the amount one would spend to obtain an unimportant date or mint-mark would purchase one or several artistic medals. For your convenience we have listed the medals according to size. The figures are in sixteenths of an inch. Lot number 360 for example, is size 62 or  $3\frac{7}{8}$  inches in diameter.
